"Grow More Glads -- Our National Flower"

1939 INTRODUCTIONS

Barcelona (Kelley) (Exhibition and Commercial) A wonderful cream glad with a touch of yellow. Eight very large, somewhat ruffled, round blooms open at a time on a tall strong growing plant. This was one of the outstanding varieties last season. Barcelona won the Silver trophy at the Ohio Glad Show for the Champion Seedling. (No. 66) One of the best cream colored varieties yet introduced. A distinct type. When the stock of Barcelona gets more plentiful I believe it will be grown very extensively.

\$6.00 each for any size bulb. Bulblets \$1.00 each.

Bombay (Wilson) Janet X Betty Nuthall. (Description by originator) Would say this is a most pleasing color of smoky light old rose with light coppery tints and a blue borders around all petals. Small velvety cherry throat blotch bordered slate. Florets $5\frac{3}{4}$ inches. Wide open, no hood. Always faces one way, ruffled and heavily fluted and heavy substance. Spikes 60 inches long without a kink. Unique color effect sure to please the smoky fancier and exhibitor.

Sizes No. 1, 2, 3—\$2.00 each No. 4, 5, 6—\$1 each Blts. 20c ea., 14 for \$2

Colonial Maid (C. G. Young) (Exhibition and Commercial) A real lavender glad. Somewhat lighter in color than Minuet, but a very fine glad. Grows somewhat taller than Minuet and has better growing habits. Spikes are tall and straight with six to eight $4\frac{1}{2}$ inch florets open, on a 20-bud spike. It seems to have everything that is required of a real glad. Some very fine spikes of Colonial Maid were grown this past season.

Lavender Ruffles (Wilson) Janet X Minuet (Description by originator). In a color and type class all its own among lavenders. A delicately shaded lavender self, cream throat lightly peppered lavender, fine ruffling and well open, not hooded, petals slightly recurved at tips. Florets tightly fastened to strong slender stem. Bloomed the past season in 69 days. Lins Trial Gardens report—"Overall length 58 in. Head length 22 in. 6 open, florets $5\frac{1}{2}$ - 6 in. Foliage broad and healthy. We were unable to criticize it in any way." Will bloom from bulblets.

Sizes 1, 2, 3, \$3 ea. Sizes 4, 5, 6, \$2 ea. Blts. 30c each, 14 for \$3.00

Malay Chief (Wilson) Morocco X Commander Koehl (Description by originator) First decorative seedling Pennsylvania Gladiolus Society Show 1938 in large class. Very deep purple red with glistening black sheen. Up to 4 in. floret, 18 buds, 58 inches tall. Opens eight or better. No hood. Very heavy texture. Strong stiff stems, always straight. Fine stretch of flower head without stem showing through. Fairly early. Heavy producer. A few off-face florets but otherwise a fine performer and show glad.

Sizes 1, 2, 3, \$2.00 each Sizes 4, 5, 6, \$1 each Blts. 20c each, 14 for \$2

Reflection (Kinyon) Exhibition type. Lavender. This new glad has every quality demanded of a variety to make it a leader in popularity and of real commercial worth. The color, size, habits and general perfection will force this flower to the top. Clear lavender without any markings, flecks or lines. Florets round and of fine texture. Excellent keeper and shipper. Blooms in 85 days, grows to an average height of 5 feet with 6 or more well placed florets open. Fine propagation and germination of bulblets.

"GROW MORE GLADS—OUR NATIONAL FLOWER"

1938 INTRODUCTIONS

Amanda is a deep salmon pink with a soft yellow throat which blends beautifully. Has six to eight 5 inch florets open at one time. Spikes tall and straight. Usually average 50 inch spike, although the past season we cut some 60 inches long, (without injuring the bulb.) Another feature of this glad is good placement of florets. They all face forward. Florets are of good substance, which accounts for its lasting qualities. Plants are very vigorous.

AMANDA bloomed in 60 days from large bulbs in our field this past year.

AMANDA is a very vigorous grower and produces a great amount of large bulblets. Bulblets germinate fine. Hull on bulblets are almost like paper. Because this glad is a great increaser, it is bound to take the place of some of the glads now on the market, that are hard to keep going. We grew quite a few No. 1 and No. 2 bulbs from bulblets this year. This was regular field grown stock. No special care.

HERE IS WHAT OTHERS THINK OF AMANDA

"That pink seedling (Amanda) I am sure is going to be a REAL FLORIST'S SPECIAL when enough of them are available."—ERWIN D. CARY,

"It took very well with the customers, because there were always from six to eight large florets open and in good shape."—CARL F. BREHMER AND OWEN D. GRAY, Prop. Central Flower Shop

"The color is wonderful, the stem is a nice length and straight, and the bloom is a fine keeper. We have found a ready sale for all the blooms you furnished us."—FRANK J. TOMASTIK, Prop., Tomastik Greenhouses.

Hildred (Love) Exhibition. Lavender without markings, about the shade of Minuet, or possibly a shade darker. Nine medium size florets open on a spike of good height. 20 to 22 buds. When florets are fully open they face slightly upward. Won American Home Achievement Award.

Large ea. \$2.00 Medium, ea. \$2.00 Small, ea. \$2.00 Blts. 25c; 12-\$2.50

Iosco (Kinyon) Exhibition. Color Ivory Buff. Will grow 6 feet high with 8 or more 6-inch florets open at once. Gigantic in every way as to height, florets, stem, leaves and buds. Bulblets growth very sturdy.

GROW AND EXHIBIT UHRIG GLADIOLUS

(1938 INTRODUCTIONS CONTINUED)

White Spire

(Kinyon) Pure white. A tall growing variety, the tips of the spikes standing 4 to 5 feet high. Five inch florets with 8 open on a strong straight stem. The color is a pure glistening white with no markings. 18 to 24 buds. White Spire may be cut tight in bud, yet it will open perfectly. Germination and propagation excellent. White Spire received first awards at the Indiana, Connecticut, Michigan and New England shows in 1938.
